

## Finding out the Current Working Directory

To find out the current *Working Directory*, we use the `getwd()` command

```
getwd()
# [1] "C:/Users/Computer5/Documents/R"
```

## Changing out the Current Working Directory

- At the top of RStudio, click on the **Session** menu
- Click on ***Set Working Directory***
- On the Submenu that appears, click on ***Choose Working Directory***.
- Select the working directory you have created for this workshop.
